Summary

Systems engineer with production experience in datacenter modernization, cloud infrastructure, and workflow automation. Led NOC operations and systems escalations at Front Range Internet Inc. (FRII), and now build, deploy and support integrated systems for Technomancy IT clients. My work connects deployment and recovery tooling to the teams that have to operate it.

Skills

- Microsoft Azure, AWS and Windows Server
- Docker, Kubernetes, Hyper-V and VMware ESXi
- GitHub Actions, Bash and deployment automation
- Power Platform (commerce automation), REST API integration and service access controls
- Monitoring, recovery verification and operational escalation

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Build, deploy and support production systems for clients, including Microsoft Azure environments; own incident escalation and ongoing support.
- Automate deployment and database recovery checks; integrate APIs and SaaS workflows with access controls and service identities.
- Built a commerce automation app in the Microsoft Power Platform ecosystem on an approximately eight-month client contract.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC operations and engineering escalations; built monitoring and operator tooling for NOC staff and hosting and colocation customers.
- Migrated workloads from Hyper-V and VMware ESXi into Docker and Kubernetes and carried out targeted server and firewall upgrades.
- Ran SOC 1 and SOC 2 audits and documented infrastructure controls, recovery checks and procedures for operators.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built CRM, provisioning and onboarding tools across locations, replacing manual network setup with Node.js automation.
- Designed a Linux routing system with separate office VLANs, individual Wi-Fi accounts and per-office bandwidth and access settings.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported managed-service client networks and endpoints, building diagnostics for recurring issues and handling on-call escalation.

Infrastructure and Systems Focal

IBM

2010 - 2012

- Automated backup, auditing and compliance tasks with scripts and managed virtualization test labs and hosted desktops.
- Built an internal backup tool used by executives and other staff to reduce licensing costs.

Selected Projects

Automating office onboarding

Office Evolution · employment

2014 - 2015

- Built a Linux routing system that mapped individual Wi-Fi accounts to the right office VLAN. I set bandwidth and access by office and automated parts of router and firewall setup with Node.js.

Deployments and backup recovery checks

Technomancy IT · practice platform

- Built a Git-tagged release workflow that applies SQL migrations and verifies both container health and the public HTTP endpoint. Wrote a separate PostgreSQL backup check that restores into a disposable instance and checks the recovered tables.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA Network+ | CompTIA | Earned
